NBC News|SurveyMonkey Poll Results

The NBC News|SurveyMonkey poll was conducted online from Friday, July 20 through Thursday, July 26, 2018. Results are among a national sample of 5,145 adults aged 18 and over, including 4,526 registered voters. The results below are among registered voters. The error estimate for registered voters is plus or minus 2.0 percentage points.

Subgroup error estimates can be found in the methodology section below.

**TOPLINE RESULTS**

Which one of the following issues matters MOST to you right now?

<table>
<thead>
<tr>
<th>Issue</th>
<th>7/20—7/26/2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Foreign policy</td>

<tr>
<td>No answer</td>
<td>2</td>
</tr>
</tbody>
</table>

What one word would you use to describe the Republican Party? [OPEN-ENDED]

What one word would you use to describe the Democratic Party? [OPEN-ENDED]

**INTRO:** We’d like you to rate how you feel towards the Republican and Democratic parties on a scale of 0 to 10, which we will call a “feeling thermometer.” On this feeling thermometer scale, ratings between 0 and 4 mean that you feel negative and cold (with 0 being the most negative/coldest). A rating between 6 and 10 means you feel positive and warm (with 10 being the most positive/warmest). A rating of 5 means you have no feelings one way or the other.

On a scale of 0-10, how would you rate the Republican Party?

</tbody>
</table>

Thinking about the upcoming midterm elections, will your vote mainly be:

<table>
<thead>
<tr>
<th></th>
<th>For your candidate</th>
<th>Against his or her opponents</th>
<th>Don’t plan to vote</th>
<th>No answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>7/20—7/26/2018</td>
<td>75</td>
<td>14</td>
<td>8</td>
<td>2</td>
</tr>
</tbody>
</table>
METHODOLOGY
The NBC News|SurveyMonkey poll was conducted online among a national sample of 5,145 adults aged 18 and over, including 4,526 who say they are registered to vote from July 20 through July 26, 2018. Respondents for this survey were selected from the nearly three million people who take surveys on the SurveyMonkey platform each day. Data for this week has been weighted for age, race, sex, education and region using the Census Bureau’s American Community Survey to reflect the demographic composition of the United States.

Because the sample is based on those who initially self-selected for participation rather than a probability sample, no estimates of sampling error can be calculated. All surveys may be subject to multiple sources of error, including, but not limited to sampling error, coverage error, and measurement error.

To assess the variability in the estimates and account for design effects, we create a bootstrap confidence interval to produce an error estimate. The bootstrap confidence interval for this survey is plus or minus 2.0 percentage points.

To calculate the bootstrap confidence interval, we use the weighted data to generate 10,000 independent samples and calculate the 95% confidence intervals for the weighted average. When analyzing the survey results and their accuracy, this error estimate should be taken into consideration in much the same way that analysis of probability polls takes into account the margin of sampling error.
